

/ General section

Discription of the first section goes here.

```
import os
```

/ Section with code output

Discription of the second section goes here.

```
print("Hello World!")
```

Hello World!

/ Section without code output

This section will be evaluated but the output will not be displayed.

```
print("Hello World!")
```

/ Section with code evaluation without output

This section will be evaluated but the output will not be displayed.

```
print(os.getcwd())
```

/ Section with code evaluation and output

This section will be evaluated and the output will be displayed.

```
print(os.getcwd())
```

/home/runner/work/pyansys-quarto-cheatsheet/pyansys-quarto-cheatsheet

/ Section without code evaluation

```
print(os.getcwd())
```

If there is no evaluation, the code cell will not be executed. So the output will not be displayed.

/ Section without code echo

This section will not be evaluated and the code cell will not be displayed on the rendered document. But the output will be displayed.

Hello World!

/ Section without code echo and output

This code cell will not be displayed on the rendered document. And the output will not be displayed.
